2 So, basically, you know, it really 3 depends on how they are getting cases. This 4 looks like the cancer criteria. If you are 5 going to go buy a case from one of the major 6 companies out there, Broughton Partners, 7 Reliance, whoever.

This is the more strict criteria 9 to avoid them paying for a case, a lower 10 valued case.

> MR. MOXLEY: Let's take that down and let's bring up the "Cases to be declined."

14 Q. So, Mr. Onder, again, we're still 15 on the same Exhibit 5. This is the criteria, again, "Cases to be declined" section of that 17 document.

18 Do you see that?

19 A. Right.

20 Q. Okay. And so if there is no

21 diagnosis of the cancer, that's a declined

22 case, correct? A. Correct. 23

24 Q. Okay. The second one there, use 25 of other talc or powder-based products and J. ONDER

2 referring to me to get the most bang for their buck and make sure that their purchase is cost effective. So that, ultimately, their return on investment will work for them. 6

I don't want them paying that \$5,000 on the lesser valued cases; such as cervical, uterine, et cetera.

So, again -- so what I do is this 10 11 is strict criteria that they can handle one 12 of those companies and say, I will not pay X 13 number of dollars per case on these lesser 14 valued cancers, okay.

By contrast, if they are running 15 16 their own ad campaign and it's not costing 17 them any additional advertiser or any 18 additional dollars to sign the extra cases, 19 such as uterine, I would urge them to sign 20 them, realizing that they are lower valued cases and they're not as supported by -- you 22 know, their -- association is not as strong 23 in the medical literature. 24

So I would encourage those to be 25 signed, just as I've always signed them. So

5 Q. Okay. And is that based on --6 it's, basically, the word of the individual claimant, correct? 7

A. Correct.

9 Q. Okay. For the different types of 10 cancer, you go midway through the chart 11 there, you see the diagnosis there of

12 different types of cancer?

13 A. Yes.

Q. Okay. Why are -- why is cervical 14 15 cancer among the cases to be declined?

A. Okay. Again, this has -- this is 16 17 a business decision for the economic benefit 18 of my referring attorneys. If you are going 19 out to, for example, a Broughton Partners and 20 they are doing the advertising and marketing 21 for you and they are charging, you know, \$100

22 a case -- or, well, let's use a more

23 realistic number.

that they -- so it really depends on what kind of campaign they are running. 3

Right now, if someone comes and says, I'm running a campaign -- you know, there is always -- I have to protect my referring attorneys from not being taken 7 advantage of -- by their advertisers is the 9 bottom line. And that's what this criteria 10 reflects.

11 Q. This criteria reflects and your 12 last answer reflects that these -- that the cancers that are listed on this "Cases to be declined" chart at Exhibit 5, these are, in your estimation, lower value talc claims, 15 16 correct?

A. Correct.

Q. Why is that?

19 A. They have -- they are not as strongly supported by the medical literature. 20 21

So for example, uterine cancer, 22 you know, there are some studies -- and 23 studies go both ways. One or two or three 24 can't, you know, epidemiologic studies, you 25 know, provide proof of the association.

If the answer comes back, yes, I 3 4 have talked to another attorney and they told 5 me they would not take my claim, what happens next under Onder's processes? 6

A. Yeah, did they tell you why, what 8 kind of cancer do you have, do you have the 9 pathology report is the key thing we would 10 like to see.

11 And, you know, like I said, one of 12 the major players in this litigation was 13 rejecting good cases left and right. And 14 because they were friends of us, we called 15 them up and pointed it out to them that they 16 really ought to have a doctor review those 17 things as opposed to the paralegals because 18 the paralegals were rejecting a lot of good 19 cases. And they started using our doctor. 20 So, again, I don't -- I never --21 some of my best cases in the history of my 22 firm are cases that I got were rejected by

24 were doing. So, you know, we try to find out

23 other firms who just didn't know what they

J. ONDER

In the primary chart, we probably have -- at any given time, we will have several thousand cases where we are waiting on medical records and medical records are unavailable and things of that nature.

And then the others would be other gynecologic cancers that we are -- we have been hoping the medical literature would advance. You can all move, quote, inventory 11 cases.

12 Early in the litigation we sat 13 down with leadership firms and we all -- all of the early firms evolved, said, okay, what cases do we want to push to trial? What cases do we think should we reject and which 16 17 cases should we inventory?

And my -- my definitions, I think, are completely consistent with the MDL leadership because we all agreed on them.

- Q. How many of the 21,411 claims 21 22 identified in that last exhibit are 23 mesothelioma claims?
- 24 A. Put it this way: It's on the 25 chart, the exact number, because I think we

2 the basis of it and, hopefully, if they have 3 the pathology report, we ask for that so that we can have our MD's review it.

Q. Okav.

MR. MOXLEY: Deane, let's take this down.

Q. Mr. Onder, I'm going to -- some of 9 my questions, I may refer to that 21,000

10 figure. If you need to see that again for

11 any reason, just let me know, but that's the

12 figure I'm talking about. Okay?

13 A. Sure. Sure.

Q. Okay. How many of OnderLaw's 14

15 21,411 clients that were listed in that

16 exhibit are ovarian cancer clients?

17 A. The exact number, obviously, I 18 don't know for sure because that's -- you

19 know, like I said, it varies from day-to-day.

20 Opens, closed, rejects, et cetera.

21 I know right now we have somewhere 22 between 8,500 and 9,000 with ovarian cancer 23 of confirmed and documented histologic

24 sub-types that, you recall, would vary.

25 There would be the so-to-speak "good cases."

identified them as mesos, but it's around a dozen, if I'm not mistaken. 3

Q. Around 12?

Α. That sounds about right.

J. ONDER

Q. Okay. What other diagnoses have 6 7 claimants received among those 21,411 claims?

> Α. Mainly uterine.

Do you recall any -- so we've

talked about ovarian cancer claims, that's 11 approximately 8,500 to 9,000. 12,

approximately, meso claims. And there is

13 uterine claims. 14

What other claims do you recall 15 being among your pool of clients?

A. Put it this way: Mucinous, okay, 17 mucinous borderline. That's one that, you know, I think there is a little bit of 19 disagreement about the strength of those cases. I know, you know, some people like Mark Robinson think they are very, very 21 22 strong cases.

23 I think they are pretty good cases. Some say, eh, they're not as good. So that's one that, kind of, falls in that --

2 in between Category. One of the ones that I

3 think are good, I think the medical

4 literature will ultimately advance. And,

5 therefore, I have been accepting from day one

6 is uterine. Like I said, I've filed about

7 two to 3,000 of those, spent over a million

8 dollars doing that.

Most, you know -- so I have three 9 10 categories. That one that everybody admits 11 was the best of the best cases. I have a 12 couple thousand, probably, that I'm trying to 13 get medical records on and so forth. And the

14 rest, I would say 99 percent of the rest are 15 uterine.

16

Back when other cases -- back when 17 some firms didn't want to accept uterine, I 18 was willing to accept them and as a result, I 19 think I became, you know -- people from all 20 over the country were referring me uterine 21 cancers.

Q. Okay. So I'm just trying to do 22

23 some rough math then, if I could, Mr. Onder,

24 with you?

1

5

9

25 A. Yes.

J. ONDER

2 have a couple thousand that are still being 3 reviewed.

4 Q. Okay. Tell me -- I'm sorry, just tell me your breakdown from that. That was very helpful.

So what is your breakdown? I'm just trying to understand the facts, sir.

What's your breakdown?

10 A. I would estimate about 9,000 that are identified as the high value cases that 11 we wanted to push to trial as ovarian cancer 12 13 leadership.

14 There is probably about 9,000 that 15 are uterine or have supported medical 16 literature, but were ones that we didn't want 17 to push Daubert yet. And there are probably 18 about 3,000 that are under review, waiting 19 for medical reviews, things of that nature.

20 Q. Okay. Of the 9,000 uterine, you 21 think about two to 3,000 of those have been 22 filed; is that right?

A. At least, yes.

Q. At least, okay. 24

25 And the 3,000 that are under

Page 186

Page 188

J. ONDER

2 Q. Let's say you're -- let's just 3 say, for rounding figures, that you have 4 9,000 ovarian cancer claims.

A. Okay.

Q. And let's say you had -- you said 6 7 you had two to 3,000 filed uterine claims, 8 correct?

A. Those are the filed ones, right.

10 Q. Oh, yes. So that gets us -- if 11 you do nine plus 3,000, that gets to 12,000, 12 right? So the figure there was 21,411.

So is it fair to say that the 13 14 difference between approximately 12,000 and 15 the 21,000 figure that was identified in the

16 filing, that the remainder of those are 99

percent unfiled uterine claims; is that 17 18

riaht?

19 A. 99 percent uterine, right, 20 probably.

Q. Okay.

21 A. If I understood where you were 22 23 going with that, I mean, I would probably 24 have 9,000 uterine cancer cases. I have 25 9,000 of the other cases of cancer. And I J. ONDER

review, those, obviously, haven't been filed because they being reviewed, correct? 3

A. Correct.

5 Q. Okay. Does OnderLaw have engagement agreements with all 21,411 clients that were identified on that? 7

A. We sure should.

9 Q. Okay. Is it your expectation that 10 vou do?

A. Yes.

12 Q. Okay.

A. I think they shouldn't be in our system if we don't have a contract with them. 14

Q. Okay. How many talc clients, approximately, did OnderLaw have at the time that LTL 1 was filed in 2021? 17

A. Put it this way: I don't remember 19 timeframes. I know at one time we had at least 25,000, 26,000, 27,000 signed. 20

So, again, it's been worked 21 22 through and reached --

2 A. I can tell you as to Imerys, we 3 did cite in-place procedures, yes. I would 4 assume we would do the same here. It depends 5 how the voting structure turns out. We will 6 either do the same here or -- I think the 7 favored method, as I understood it -- as I 8 understand it, is to -- that there has been 9 some talk of a way that we can ask each 10 individual to vote electronically. That 11 might assist in more accurately allowing the 12 clients to express their particular

14 Q. Let me just ask you, I don't know, 15 obviously, what your processes were in the 16 Imerys case or what your processes have been 17 in other cases.

18 So as a general matter, in 19 developing processes to make sure that you 20 understand client instructions with respect 21 to how to vote, what sources of information 22 would OnderLaw look to to confirm whether or 23 not it's received instructions from a client? 24 And what I mean by that, to help 25 hopefully guide you in understanding the

J. ONDER

2 them a procedure whereby if they don't agree with our decision, to please contact us and we give them a method to contact us either by text, e-mail, or phone call, that we don't vote their -- you know, their case. 7

Q. And similarly, Mr. Onder, you would take steps to ensure that no master ballot was filed that would be on behalf of a client who, in one of the forms of 10 communication that you just outlined, had instructed you that they wanted to vote no. 12

You wouldn't have a master ballot vote of yes for that client, correct?

A. That's correct.

MR. HOFMEISTER: Objection to the form of the question.

A. And with respect to your comment 18 about social media posts, we do not look at 19 20 social media posts. I mean, people have access to each other's, you know, accounts. There are all kinds of duplicate accounts, 22 23 fraudulent accounts. Just the other day, I 24 got a letter that someone was alleging to be

me, setting up an account under my name.

Page 210

J. ONDER

2 question, is, would it be limited to phone 3 calls that came in, to letters that came in, 4 or would you also look at social media posts 5 that clients may have made in response to 6 Facebook posts or blog posts that you've put on your website or on your Facebook page? MR. RASMUSSEN: Objection to the 8 form of the question. 9

A. Yeah. I, you know -- again, 10 11 Facebook posts and all that -- let me tell 12 you what we would do -- I mean, what we've 13 done in the past and will presumably do this 14 way depending on how the Court orders us to 15 vote.

16 You know, generally speaking, we 17 will write a letter to the -- a fiscal letter 18 to the client telling what's going on and how 19 to -- you know, what our position on it, pros 20 and cons, and, you know, what we think, the 21 way they should vote. We would also do that 22 by e-mail and we'd give them a text that 23 links to the e-mail, because a lot of people 24 don't check their e-mail. 25 So the three combined, and we give

Page 212

J. ONDER

So the bottom line is, we don't look at social media posts because there is no way to verify if it's truly the client who is expressing that opinion.

2 in the plan there's a number there, I think 3 it's kind of a placeholder number. I don't 4 think that's based on any analysis that I've 5 heard of.

Q. Sure. And so -- and we just --7 we're going to go to the plan next on the 8 same point, but with respect to the PSA,

9 because that number was not yet determined, 10 you would have needed that information before

11 you could have made a determination whether 12 to recommend to your uterine cancer clients

13 that they should support a plan, fair?

14 A. That's fair.

15 Q. All right. And then, if we switch

16 to the plan that's on file that was filed on

17 May 15th, under the plan in Section 5.3.3

18 where you have point values for claimants

19 that would have to do the advanced payment or

20 the expedited payment option, and that

21 includes the gynecological cancers, they

22 would be assigned 500 points, right?

A. Put it this way: That's what the 23 24 plan says.

Q. Right. And I'm just going to run

J. ONDER

it stand? I would love to have your input.

Q. Sure. No. I totally understand that, sir.

And just so we are clear, the numbers, at least, as we have gone through, with respect to the plan as it's written right now, that we have reviewed are the numbers that are in the plan now, right?

A. Right.

11 Q. Okay. And then, the -- and I'll 12 ask you a question that I think Mr. Thompson may have asked you before, but I think it's a 13 little different. 14

15 As the numbers are in the plan --16 I think you referred to them a minute ago as 17 a placeholder there -- the 250 to \$1,000 range would not be acceptable to you for your 18 19 uterine cancer cases?

20 I'm not asking for anything you've said to a mediator. I'm not asking for 21 22 anything you have negotiated with anyone 23 else.

24 I'm asking you, 250 bucks to 1,000 25 bucks would not be enough for your uterine

Page 334

Page 336

J. ONDER

2 through it real quick. And the goal in

3 Section 7.1 of the plan is to have a point

4 equal a dollar and they say, but it's our

5 expectation it will be at least somewhere

6 between \$0.50 on the bottom or \$2 on the high

7 end per point, fair?

A. Fair. 8

Q. And if we do the math, that means

10 a uterine cancer case under the plan with the

placeholder value that's in there right now

12 would get somewhere between \$250 and \$1,000,

13 right?

A. Right. I mean, here's the thing,

15 that's the -- hate to say it, that's one of

16 the problems with the plan. I mean, that's

17 one of the points of negotiation because

18 until we hear from the FCR, we don't know how

19 much money needs to go in -- to get a number

20 that everybody perceives as reasonable. And

21 what is a number that everybody perceives as

22 reasonable?

You know, given the state of the

24 medical literature compared to, say, you

25 know, the other ovarian cancers, where does

J. ONDER

cancer cases to get your recommendation,

3 would it?

1

4

5

MR. MONTEFUSCO: Object to form.

A. I don't know. I don't know for

sure. I mean, the thing is, there's a lot of

other factors that go into it, and I -- you

know, yeah. I mean, in terms of the numbers

that I've recommended and so forth, I'll go

10 into mediator privilege. I think that J&J is

open and amenable to discussing those numbers

12 within a reasonable range, and I'm pretty

13 confident we can come to that I do think is

14 fair and reasonable, and that you would think

is fair and reasonable, given the totality of

the circumstances if we all get together and 16

17 talk.

18

21

Q. All right.

19 MR. RUCKDESCHEL: I think that's

to support the plan and to support putting together a deal. I chose to support this because I think we can do a deal because I think resolution is in the best interest of everybody. Okay?

I mean, Greg Gordon and the First Day Declaration, Mr. Kim and everything say, hey, everything is subject to negotiation, 10 it's not binding. But by the same token, I truly believe that this can be resolved if 12 everybody sits down and sits together and 13 talks.

Am I contractually bound? No. Do I feel an obligation to live by my word and do what I think is in the best interest of my clients? Absolutely. And that's what I will do, you know, even if 18 19 other people might disagree with me.

So am I bound -- I guess the more 21 accurate question is -- or answer to the 22 previous question is, am I bound? Well, no, 23 according to -- you know, according to my interpretation and everything else, but by 25 the same token, am I committed to this deal?
